

- Items: led lights 4, ceiling fan 3

The screenshot shows a web browser window with the URL '127.0.0.1:8000/home-planner'. The page title is 'PocketSmart AI'. The form contains the following inputs: Budget (12000), Rooms (3), Style (modern), City (Chennai), and Items (led lights 4, ceiling fan 3). A blue button labeled 'Generate Recommendations' is at the bottom of the form.

Home Interior Planner form filled with budget, rooms, style, and items

## Step 2: Generate recommendations

Click Generate Recommendations at the bottom of the form. The app processes your inputs and returns AI-powered suggestions based on your budget and requirements.

## Step 3: Review your recommendations

The results page displays a budget summary and recommended items.

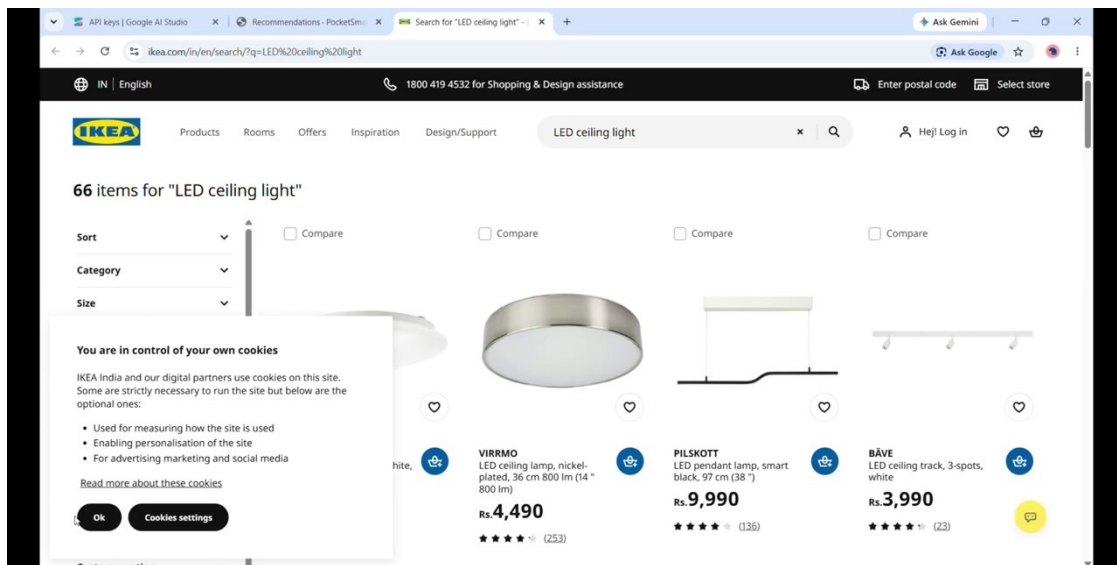

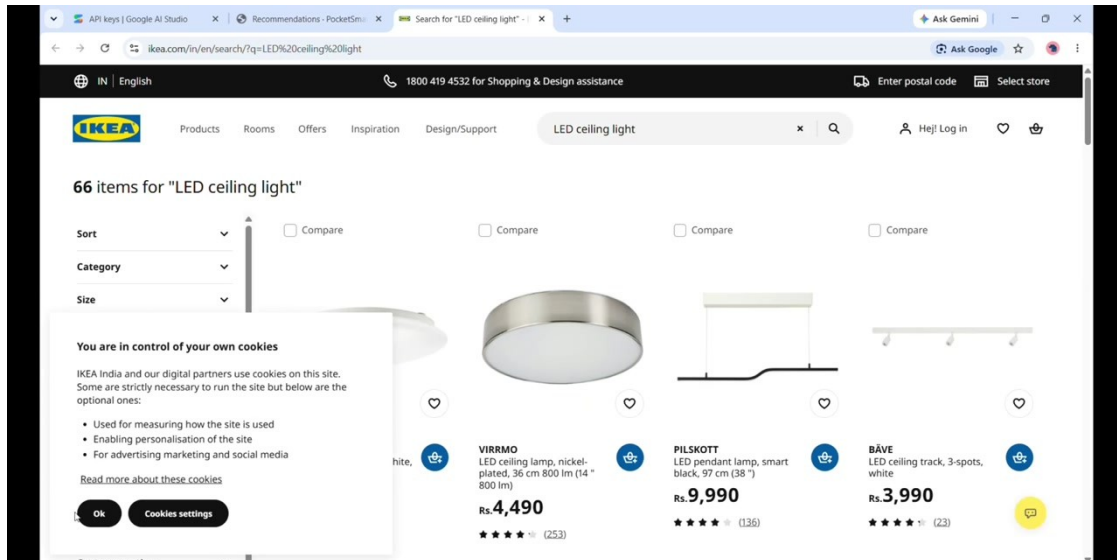

Note: If a live AI response isn't available, PocketSmart AI shows fallback recommendations instead, with a notice explaining this.

Example results:

- Estimated total: ₹4,000
- Remaining: ₹8,000
- LED ceiling light — Lighting, IKEA, ₹1,200 — "Energy-efficient and suitable for general room lighting"
- Ceiling fan — Fan, Amazon, ₹2,800 — "A practical choice for airflow while keeping the budget controlled"

Each item includes a Search on platform link that opens the retailer's site with a matching search. You can also click Open saved result to view or manage saved

recommendations, which shows the same fallback notice, budget summary, and itemized breakdown with direct search links.

Tip: Prices shown are estimates — use the platform links to check current availability and pricing before you buy.
